Hyper Mini Fisheye IP Camera

The Multiple Streams Ultra High Definition Mini Fisheye IP Camera is a high resolution surveillance solution features 360° wide coverage without blind spots. Mini fisheye camera supports resolution up to 12 Megapixels streaming at 20 fps which allows the videos to be viewed smoothly. Moreover, the fisheye camera supports digital PTZ, panoramic view and several display modes to fulfill users' needs. With the Compact and Concise design, Mini Fisheye Camera is suitable to apply in many kinds of environment, such as office room, hotel, vehicles, etc.

Furthermore, the embedded edge dewarping engine enables the fisheye camera to dewarp images by camera rather than backend system. Therefore, edge dewarping technique reduces the burden of backend system and also enhances the flexibility of usage. Featuring IR LED module and Smart Picture Quality/Noise Reduction improves the image quality in low light environments.
